	Intermittent Stream
	River / Lake
	Glacier

Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

A following a place name indicates that the place is coterminous with a CD, i.e., it is located entirely within a place with the same CD number.

A following a place name indicates that the place is partially within a place defined within a federal census tract boundary and numbers within the subject area; nonfederal census tract boundaries are shown outside of the subject area, but without numerical identifiers. The place may be a portion of a census tract defined within a federally recognized American Indian reservation or off-reservation trust land for the purpose of providing data based on an American Indian tribe's jurisdiction over its members and their families, or it may be off-reservation trust lands cross state or county boundaries, the same as the place they are located in. A place may also be a portion of the boundary, and if so, constitutes a single tribal census tract entity.

A following a block number indicates that the block number is repeated elsewhere in the block.
